

BTS PETITERRA SALES & SUPPORT PROJECT

PROJECT: Petiterria Sales & Support Process for BTS Motors

Submitted By: Group 7F7

CLIENT: BTS Motors Incorporated

VISION: To provide an efficient and seamless experience managing their complex sales and support process under one cloud-based Application.

MISSION: Build a robust, technology-based, high-quality portal to enhance their value processes and satisfy our stakeholders and customers.

Problem Statement

BTS Motors is in need of a robust system to streamline their sales and support processes and address the inefficiencies caused by fragmented systems and manual processes. Here's a plan to help them build an efficient and scalable sales and support process:

1. **Implement a CRM System:** BTS Motors should consider implementing a CRM system using Salesforce, which can centralize customer data, streamline sales processes, and provide visibility into customer interactions. This will help eliminate data silos and improve efficiency by providing a single source of truth for customer information.
2. **Customize for Dealership Needs:** Customize the CRM system to fit the specific needs of a dealership environment. This may include customizing fields, workflows, and reports to align with the sales and support processes unique to BTS Motors.
3. **Integrate Sales and Support Processes:** Ensure seamless integration between sales and support processes within the CRM system. This includes automating the handoff of customer information from sales to support teams, enabling support agents to have full visibility into customer interactions and history.
4. **Implement Case Management:** Utilize the case management functionality within the CRM system to track and manage customer support inquiries efficiently. This includes assigning cases to appropriate agents, setting SLAs, and providing tools for agents to resolve cases promptly.
5. **Provide Training and Support:** Offer comprehensive training to dealership staff on how to use the CRM system effectively for both sales and support processes. Provide ongoing support and resources to help staff troubleshoot issues and maximize productivity.
6. **Monitor and Analyze Performance:** Set up reporting and analytics dashboards within the CRM system to track key metrics related to sales and support performance. Analyze this data regularly to identify areas for improvement and optimize processes accordingly.
7. **Continuous Improvement:** Encourage a culture of continuous improvement within the dealership by soliciting feedback from staff and customers on the effectiveness of the sales and support processes. Use this feedback to make iterative improvements and ensure the system remains efficient and scalable over time.

By following these steps, BTS Motors can build an efficient and scalable sales and support process that eliminates inefficiencies, improves customer satisfaction, and drives business growth.

Project Overview

BTS Motors, established in 2021 by the esteemed African-Canadian entrepreneur and technology expert, Babatope Olajide, emerged in response to the observed dearth of individuals from diverse backgrounds managing car dealerships across North America during the COVID-19 pandemic. Situated in Waterloo within the Greater Toronto Area (GTA) of Ontario, Canada, BTS Motors has garnered considerable success, marked by a substantial surge in sales attributable to its distinct value propositions.

The dealership places a keen emphasis on serving an underserved yet burgeoning immigrant demographic, renowned for prioritizing quality and value in their purchasing decisions. Moreover, this clientele exhibits discerning expectations regarding post-sales service, demonstrating a firm commitment to receiving commensurate value for their investments without compromise.

Integral to BTS Motors' sales strategy is the cultivation of referral networks within religious institutions, namely churches and mosques, facilitating the dissemination of their product offerings. With a diverse range of automobiles available for sale across various regions, the dealership extends its services nationwide, supported by a sizable sales and service team entrusted with overseeing operations across diverse territories.

Despite its success, BTS Motors confronts challenges inherent in navigating its intricate sales process, characterized by multiple stages spanning from lead generation to deal closure. Particularly, the service team grapples with the need for comprehensive visibility into their daily tasks and encounters difficulties in effectively managing cases and ensuring customer satisfaction.

Key Indices & Description

Here's the information tabularized with key indices for easy reference.	
Key Indices	Description
Founding Year	2021
Founder	Babatope Olajide
Location	Waterloo, Greater Toronto Area (GTA), Ontario, Canada
Target Market	Underserved immigrant community biased towards quality and value
Sales Strategy	Referral networks at religious centers such as churches and mosques
Product Offerings	Range of automobiles sold in different regions
Service Coverage	Nationwide
Sales and Service Team	Large team responsible for managing activities across various territories
Sales Process	Complex, involving multiple stages from lead generation to deal closure
Customer Expectations	High expectation for post-sales service delivery to ensure value for money and customer satisfaction
Challenges	Service team lacks full visibility of daily tasks and faces difficulties in handling cases and ensuring customer happiness

Project Goals & Objectives

The project aims to revolutionize BTS Motors' sales and support processes by leveraging Salesforce's Sales and Service Cloud capabilities. Through streamlined processes, enhanced customer service, and optimized territory management, BTS Motors seeks to achieve greater efficiency, improved customer satisfaction, and sustained business growth.

Below, we have outlined the project goals and objectives for BTS Motors Salesforce Implementation

1. Streamline Sales Process and Improve Efficiency

Objective:

- Implement Sales Cloud features to streamline lead management, opportunity tracking, and sales automation.

Key Actions:

- Capture leads from various sources and prioritize them using lead scoring.
- Track opportunities through customized stages and implement forecasting tools for revenue prediction.
- Automate routine tasks like lead assignment and follow-up emails to enhance efficiency.

2. Enhance Customer Service and Case Management

Objective:

- Implement Service Cloud features to improve customer service and case resolution.

Key Actions:

- Configure email-to-case and web form features for automatic case creation and assignment.
- Utilize Queue Omni Routing and Assignment Rules for efficient case resolution.
- Develop Entitlements and Entitlement Processes to ensure compliance with service level agreements (SLAs).

3. Centralize Customer Data and Improve Visibility

Objective:

- Centralize customer data and provide a 360-degree view of accounts and contacts.

Key Actions:

- Centralize customer data in Salesforce to provide comprehensive insights.

- Develop dashboards and reports to monitor key sales metrics and track case performance.

4. Standardize Sales and Support Processes

Objective:

- Standardize sales and support processes to ensure consistency and compliance.

Key Actions:

- Define customized opportunity stages and workflow rules to enforce consistency.
- Develop a Standard Operating Procedure document to guide sales and support processes.

5. Optimize Territory Management

Objective:

- Equitably assign sales territories and ensure balanced opportunity distribution.

Key Actions:

- Implement Territory Management features to assign territories based on predefined criteria.
- Provide visibility into territory assignments and performance metrics for sales managers.

6. Improve Collaboration and Knowledge Sharing

Objective:

- Improve collaboration and knowledge sharing within the organization.

Key Actions:

- Develop a Community Site and Knowledge Base articles using topics for efficient information sharing.
- Create a Training Manual for key members to ensure effective utilization of Salesforce features.

7. Provide Ongoing Support and Retention Plan

Objective:

- Provide ongoing support and retention plan for future Salesforce enhancements.

Key Actions:

- Propose a plan to retain the consultant for future Salesforce process implementation or improvements.

Project Phases

Phase	Objectives	Key Activities:
Planning and Analysis Phase	Define project scope, objectives, and requirements.	- Conduct stakeholder meetings to gather requirements and expectations. - Analyze existing sales and support processes to identify pain points and areas for improvement. - Define project goals, objectives, and success criteria. - Develop a project plan, including timeline, resource allocation, and budget estimation.
Design and Configuration Phase	Design and configure Salesforce Sales and Service Cloud according to identified requirements.	- Customization of Sales Cloud features for lead management, opportunity tracking, and sales automation. - Configuration of Service Cloud features for case management, email-to-case, and entitlements. - Development of customized workflows, approval processes, and territory management rules. - Design of dashboards, reports, and user interfaces for improved visibility and analytics.
Testing and Quality Assurance Phase	Ensure the functionality and reliability of Salesforce implementation through comprehensive testing.	- Conduct unit testing to verify the functionality of customizations and configurations. - Perform integration testing to ensure seamless communication between Sales and Service Cloud. - Validate data integrity and accuracy across Salesforce modules. - Solicit feedback from end users and stakeholders to identify any issues or areas for improvement.
Training and Documentation Phase	Provide comprehensive training to end users and develop documentation for ongoing support and usage.	- Develop training materials, including manuals, guides, and tutorials. - Conduct training sessions for sales and service teams on Salesforce usage and best practices.

		- Provide ongoing support and assistance to users during the transition period. - Document Standard Operating Procedures (SOPs) for sales and support processes in Salesforce.
Deployment and Go-Live Phase	Deploy Salesforce solution into production environment and transition to live operations.	- Finalize configurations and settings in Salesforce based on user feedback. - Conduct final testing and validation to ensure readiness for production. - Go-live with Salesforce implementation and monitor initial performance and user feedback.
Post-Deployment Support and Optimization Phase (Ongoing)	Provide ongoing support, maintenance, and optimization of the Salesforce solution.	- Address any issues or concerns raised by users during initial usage. - Continuously monitor system performance and user adoption metrics. - Implement iterative improvements and enhancements based on user feedback and evolving business needs. - Provide training and support to end users on new features and updates.

By segmenting the project into these phases, BTS Motors can ensure a structured and systematic approach to Salesforce implementation, from initial planning to post-deployment support and optimization. Each phase is essential for achieving project success and delivering a robust solution that meets the organization's requirements and objectives.

Project Risks and Assumptions

By identifying these risks and assumptions upfront, BTS Motors can proactively address potential challenges and capitalize on opportunities to ensure the successful implementation of Salesforce for their sales and service operations.

Project Risks

Item	Description	Status/Mitigation Process
Data Migration Challenges	There is a risk of data loss or corruption during the migration of customer data from legacy systems to Salesforce, leading to inaccurate or incomplete customer records.	Plan meticulously and clean data
Budget/Timeline Constraints	Implementing Salesforce within the set budget and timeframe is a common challenge, with projects often at risk of overrunning in both areas.	Agile methodology and mindset to structure MVP
User Adoption Resistance	Users may resist adopting the new Salesforce system due to unfamiliarity with the platform or reluctance to change existing workflows, resulting in low user adoption rates and decreased productivity	Effective Communication/Engagement and Training
Customization Complexity	The complexity of customizing Salesforce to meet BTS Motors' specific sales and service processes may lead to delays or errors in configuration, impacting the functionality and effectiveness of the system.	
Integration Issues	Integrating Salesforce with existing systems and applications used by BTS Motors may encounter compatibility issues or technical challenges, hindering seamless data flow and process automation.	
Compliance and Security Concerns	Ensuring compliance with data protection regulations and maintaining robust security measures within Salesforce to safeguard customer information against breaches or unauthorized access presents potential risks.	

Project Assumptions

	Description	Status/Mitigation Process
Stakeholder Engagement	It is assumed that stakeholders, including management, sales representatives, and customer service agents, will actively participate in the project by providing feedback, attending training sessions, and supporting the implementation process.	
Availability of Resources	The availability of skilled resources, including Salesforce consultants, IT support personnel, and end users, is assumed to be sufficient to execute the project tasks within the defined timeline and budget.	
System Compatibility	It is assumed that BTS Motors' existing IT infrastructure and systems are compatible with Salesforce and can support the integration and deployment of the new platform without significant technical obstacles.	
Training Effectiveness	The effectiveness of training programs and documentation in educating users on Salesforce functionalities and best practices is assumed to facilitate smooth adoption and utilization of the system by sales and service teams.	
Project Governance	Effective project governance and oversight, including regular status meetings, progress tracking, and issue resolution mechanisms, are assumed to be in place to mitigate risks and ensure project success.	

Project Timeline

- Project Duration: 3 weeks

Deliverables:

- Customized Sales and Service Cloud setup
- Implemented lead management and case resolution workflows
- Developed dashboards, reports, and training materials
- Standard Operating Procedure document for sales and support processes

User Stories

Sales Cloud Features and Functionality	● As a sales representative, I want to be able to capture leads from various sources, including website inquiries, trade shows, and marketing campaigns, so that I can efficiently manage and follow up on potential opportunities. ● As a sales manager, I want to implement lead scoring based on demographics, engagement, and fit with ideal customer profiles, so that I can prioritize leads and focus on high-potential opportunities. ● As a sales team member, I want to track opportunities through different sales cycle stages, from initial contact to closing, so that I can effectively manage and nurture prospects throughout the sales process. ● As a sales administrator, I want to define customized opportunity stages based on BTS Motors' specific sales process, so that I can accurately reflect the progression of opportunities within the system.	

	● As a sales manager, I want to implement forecasting tools to predict sales revenue and track progress against targets, so that I can make informed decisions and optimize sales performance. ● As a sales representative, I want to centralize customer data in Salesforce to provide a 360-degree view of accounts and contacts, so that I can access relevant information and deliver personalized service to customers. ● As a sales team member, I want to store detailed customer information, including purchase history and communication preferences, so that I can tailor my interactions and provide a seamless customer experience. ● As a sales administrator, I want to automate routine tasks such as lead assignment, follow-up emails, and quotation generation using Salesforce automation tools, so that I can streamline processes and increase efficiency. ● As a sales manager, I want to set up workflow rules and approval processes to ensure consistency and compliance in sales operations, so that I can maintain standards and accountability within the team. ● As a sales manager, I want to equitably assign sales territories to sales representatives based on geographical and industry-specific criteria, so that I can optimize coverage and maximize sales opportunities within each territory. ● As a sales manager, I want to provide visibility into territory assignments and performance metrics for sales managers and	
--	---	--

	executives, so that I can monitor performance and make strategic decisions to drive growth. As a sales administrator, I want to enable efficient management of territory changes and updates as the business grows and evolves, so that I can adapt to changing market conditions and business needs.	
Opportunity Management	- As a sales representative, I want to track opportunities through different sales cycle stages, from initial contact to closing, so that I can effectively manage and prioritize my sales efforts. - As a sales manager, I want to define customized opportunity stages based on BTS Motors' specific sales process, so that I can accurately reflect the progression of opportunities within the system and align with our sales methodology. - As a sales team member, I want to implement forecasting tools to predict sales revenue and track progress against targets, so that I can better plan and allocate resources to meet our sales goals. - As a sales representative, I want to have visibility into the status and details of each opportunity, including key milestones and next steps, so that I can stay organized and focus on advancing deals to closure. - As a sales manager, I want to analyze historical opportunity data to identify	

	trends and patterns, so that I can make data-driven decisions and optimize our sales process for greater efficiency and effectiveness. ● As a sales representative, I want to collaborate with other team members on opportunities, sharing updates and insights to ensure a coordinated approach and maximize our chances of success. ● As a sales manager, I want to monitor the progress of opportunities across the team, identifying any bottlenecks or issues that may need to be addressed, so that I can provide support and guidance where needed. ● As a sales representative, I want to receive notifications and reminders for important milestones and tasks related to each opportunity, so that I can stay proactive and responsive to customer needs. ● As a sales manager, I want to have access to real-time reports and dashboards showing the status and performance of our opportunities, so that I can quickly assess the health of our sales pipeline and take action as needed. ● As a sales representative, I want to have the ability to add notes and attachments to each opportunity, documenting key interactions and discussions with the customer, so that I can maintain a complete and accurate record of our sales process.	
--	--	--

Analytics and Reporting:	● As a sales manager, I want to create dashboards and reports to monitor key sales metrics such as conversion rates, win/loss ratios, and sales pipeline velocity, so that I can track our performance and identify areas for improvement. ● As a sales representative, I want access to dashboards showing real-time sales data, so that I can quickly assess my performance and prioritize my activities to meet my targets. ● As a sales manager, I want to analyze trends in our sales data over time, so that I can identify patterns and opportunities for optimization in our sales process. ● As a sales representative, I want to be able to drill down into specific metrics and segments of our sales data, so that I can gain deeper insights and take targeted actions to improve my performance. ● As a sales manager, I want to track all cases by departments, so that I can monitor the volume and status of cases across our customer service, sales, maintenance, and repair & replacement departments. ● As a customer service representative, I want to access reports showing the number of maintenance cases logged per month, so that I can plan resources and prioritize tasks to meet customer needs efficiently. ● As a sales manager, I want to analyze the reasons for customer inquiries and cases by department, so that I can identify areas	

	for improvement in our products, services, and processes. • As a sales representative, I want to receive automated alerts and notifications when key metrics fall outside of predefined thresholds, so that I can take immediate action to address any issues or risks. • As a sales manager, I want to collaborate with other team members to review and discuss sales performance reports, so that we can share insights and best practices to drive continuous improvement. • As a sales representative, I want to have access to historical sales data and trends, so that I can make informed decisions and forecasts for future sales opportunities.	
Customer Service Department	• As a customer service representative, I want to efficiently create a case in the system based on the reason for the customer's call, so that we can track and resolve their issue promptly. • As a customer service representative, I want the case created to be automatically assigned to the appropriate queue in the right department, so that it can be quickly addressed by the relevant team members. • As a customer service representative, I want the ability to transfer a case to the Sales team if the reason for the customer's call is related to sales inquiries, ensuring that it is handled by the appropriate sales representatives. • As a customer service representative, I want to transfer a case to the Maintenance	

	Team if the reason for the customer's call is related to service requests, specifically maintenance, ensuring that it is addressed by the maintenance specialists. ● As a customer service representative, I want to transfer a case to the Repair & Replacement Team if the reason for the customer's call is related to service requests for repairs or replacements, ensuring that it is handled by the appropriate specialists. ● As a customer service representative, I want to have clear guidelines and criteria for determining the appropriate department to transfer a case to, so that I can make accurate and efficient decisions. ● As a customer service representative, I want to track the status and progress of cases that I have transferred to other departments, so that I can provide updates to customers as needed. ● As a customer service supervisor, I want to ensure that cases transferred from the customer service department to other departments are handled promptly and efficiently, so that we can maintain high levels of customer satisfaction. ● As a customer service representative, I want to receive training and guidance on how to appropriately handle and transfer cases to other departments, ensuring that I follow best practices and maintain quality service standards. ● As a customer service representative, I want to have access to resources and documentation that provide information on	
--	---	--

	common case transfer scenarios and procedures, so that I can effectively handle customer inquiries and escalations.	
Repair & Replacement Team	- As a member of the Repair & Replacement Team, I want to receive all cases related to repair or replacement requests that are created by the Customer Service Department, so that I can promptly address and resolve the issues reported by customers. - As a member of the Repair & Replacement Team, I want to accept cases assigned to me, ensuring that I take ownership of the task and work towards resolving the customer's issue effectively. - As a member of the Repair & Replacement Team, I want the flexibility to assign the owner of a case based on workload and expertise, ensuring that each case is handled by the most suitable team member. - As a member of the Repair & Replacement Team, I want the ability to transfer a case back to the Customer Service Department if it is determined that the issue reported does not fall under the scope of repair or replacement, ensuring that it is redirected to the appropriate department for resolution. - As a member of the Repair & Replacement Team, I want to communicate effectively with the Customer Service Department regarding case transfers and any additional information needed to resolve customer issues efficiently. - As a member of the Repair & Replacement Team, I want to have access to relevant resources and documentation to assist me	

	in diagnosing and resolving repair or replacement requests effectively and in a timely manner. ● As a supervisor of the Repair & Replacement Team, I want to monitor the workload and progress of my team members to ensure that cases are being addressed promptly and that service level agreements are met. ● As a member of the Repair & Replacement Team, I want to collaborate with other team members and departments as needed to address complex cases and ensure customer satisfaction. ● As a member of the Repair & Replacement Team, I want to continuously improve our processes and workflows to enhance efficiency and effectiveness in handling repair and replacement requests. ● As a member of the Repair & Replacement Team, I want to provide feedback to the Customer Service Department on common issues and trends observed, contributing to the overall improvement of customer service processes and customer experience.

Vehicle Sales Process

BTS Motors Automations

Object Name	Type	Name	Description
Lead	Flow	BTS Motors Auto lead conversion	Automatically converts leads with a high lead qualification score
Lead	Flow	BTS Web to lead flow	Captures leads from the web
Lead	Validation Rule	Email Validation Rule	Requires the field to be populated
Lead	Formula	Lead_Qualification_Score_c	To calculate a score for each lead based on the data given at the time of lead creation. The score can help prioritize leads
Lead	Formula	Lead_Score_Image_c	To help visualize the leads that are hot or cold
Case	Flow	Web to case flow	Captures cases from the web
Case	Flow	BTS Closed case Email	Automated email snt to client prompting them to fill in the feedback flow
Opportunity	Flow	GTS Opportunity Follow up task	Automated task to prompt sales team to chase up with new opportunities within 2 days

Opportunity	Flow	Welcome Email to new Opportunity	Sends welcome email to newly created opportunity client
Opportunity	Flow	Flow to update Opportunity from quote update	Automatically updates opportunity when quote has been presented to client and/or quote has been approved by client
Quote	Flow	BTS Motors Quote Generation	Automatically generated quote pdf to be sent to client
vehicle	Flow	Inventory Flow	automatically updates inventory stock of BTS Vehicles

Role Hierarchy

Role Name	Reports To	Description
CEO	N/A	Highest-ranking executive in BTS Motors responsible for corporate decisions and overall management of resources.
CFO	CEO	Responsible for managing the company's finances, including financial planning, risk management, record-keeping, and financial reporting.
COO	CEO	Oversees the company's business operations, ensuring efficiency and effectiveness.
IT Manager	COO	Oversees the IT Team and Resolves all IT Critical - P1 Escalations
System Administrator & IT Support	IT Manager	Analyzing, troubleshooting, and evaluating technology issues.
Accounts & Billing	CFO	Responsible for recording, classifying, and summarizing financial transactions, issuing invoices and collecting payments.
Director of Sales	CFO	Manages and oversees the sales operations, designing plans to meet sales targets, developing and cultivating relationships with clients and evaluating costs to determine their products' pricing.

Regional Managers (North, East, South & West)	Director of Sales	Setting and monitoring the budget, and revenue, developing and implementing marketing, sales, and distribution strategies for products or services, establishing and maintaining relationships with key stakeholders in various regions
Senior Sales Rep	Regional Manager	Drive company sales, identify new sales opportunities and maintain existing customer relationships.
Sales Rep	Senior Sales Rep	Promote and sell products to customers, pitch products to potential customers, present new ones to existing customers, maintain existing customer accounts, and ensure a smooth sales process and customer satisfaction.
Vehicle Fleet Manager	Director of Sales	Manages BTS Motors' vehicle product portfolio, development, and maintenance
Marketing (Team)	Director of Sales	Responsible for promoting Global Tech Solutions' products and services.
Complaint Resolution Manager	COO	Manages customer inquiries and issues.
Senior Customer Service Rep	Complaint Resolution Manager	Supports the Complaint Resolution Manager with regional inquiries, issues and cases. Handle escalated customer inquiries and complaints, ensuring timely and effective resolution.
Customer Service Rep	Senior Customer Service Rep	Responsible for interacting with customers to address inquiries, resolve issues, and provide information about products or services.
Maintenance Team	Vehicle Fleet Manager	Responsible for ensuring the continuous operational functionality of vehicles within BTS Motors.
Repair and Replacement Team	Vehicle Fleet Manager	Responsible for addressing vehicle breakdowns of vehicles.

Account Object

Field Name	Data Type	Drop Down Values	Description
CurrencyIsoCode	Picklist(Standard)	USD, CAD, etc..	Currency used for financial transactions
Name	Name(Standard)		Used for identification and reference
Account Number	Text(40) (Standard)		Unique identifier for the account
OwnerId	Lookup(User) (Standard)		Individual or entity responsible for managing the account
Site	Text(80) (Standard)		Physical location or site
Account Source	Picklist(Standard)	Web, Phone, Partner Referral, etc.	Origin or channel through which the account was acquired or generated
Active	Picklist(Custom)	Yes, No	Whether the account is currently active or inactive
Annual Revenue	Currency(18,0) (Standard)		Yearly financial income associated with the account
Billing Address	Address(Standard)		Address to which invoices and bills are sent
Clean Status	Picklist(Standard)		Cleanliness or accuracy of the account data
Created By Id	Lookup(User) (Standard)		User or entity that originally created the account record
Customer Priority	Picklist(Standard)	High, Low, Medium	Priority level assigned to the account based on its importance or value
D and B Company	Lookup(D&B Company)		Reference to the Dun & Bradstreet company associated with the

			account
Jigsaw	Text(20) (Standard)		Key identifier used for integration with Data.com
Description	Long Text Area (32000)		Additional information or details about the account
Tier	Text(2) (Standard)		Tier classification of the account based on predictive analytics from Einstein.
Number of Employees	Number(8, 0) (Standard)		Number of individuals employed by the account
Fax	Fax(Standard)		Fax number associated with the account
Industry	Picklist(Standard)	Agriculture, Banking, Apparel, etc.	Industry sector to which the account belongs
Last Modified By	Lookup(User) (Standard)		User or entity that last modified the account record
NAICS Code	Text(8) (Standard)		North American Industry Classification System code for the account's industry
NAICS Description	Text(120) (Standard)		Description corresponding to the NAICS code
Number of Locations	Number(3, 0) (Custom)		number of locations or branches under the account
Ownership	Picklist(Standard)	Public, Private, etc.	Type of ownership structure associated with the account
Parent Account	Hierarchy(Standard)		Higher-level account to which the current account is subordinate
Phone	Phone(Standard)		Contact phone number for the account
Rating	Picklist(Standard)	Hot, Warm, Cold	Rating assigned to the account based on its performance or potential

Segment	Text(25) (Custom)		Segment classification of the account based on various criteria
Shipping Address	Address(Standard)		Address to which shipments are sent
SIC Code	Text(20) (Standard)		Standard Industrial Classification code for the account
SIC Description	Text(80) (Standard)		Description corresponding to the SIC code
SLA	Picklist(Custom)	Gold, Silver, etc.	Service Level Agreement terms associated with the account
SLA Expiration Date	Date(Custom)		Date when the Service Level Agreement with the account expires
SLA Serial Number	Text(10) (Custom)		Serial number associated with the Service Level Agreement
Ticker Symbol	Content(20) (Standard)		Ticker symbol representing the account if publicly traded
Tradestyle	Text(255) (Standard)		Style or manner in which the account conducts business
Type	Picklist(Standard)	Prospect, Customer-Direct, Customer-Channel, etc.	Type or category of the account
Upsell Opportunity	Picklist(Custom)	Maybe, Yes, No	Indicates whether there is potential for upselling to the account
Website	URL(255) (Standard)		URL of the account's website
Year Started	Text(4) (Standard)		Year in which the account was established or started

Appointment Object

Field Name	Data Type	Drop Down Values	Description
Assigned to	Lookup		Assigned to account owner
Created by	Lookup		Appointment created by user

Field Name	Data Type	Drop Down Values	Description
Active	Checkbox(Standard)		Checkbox indicating if the campaign is currently active
Actual Cost	Currency(18, 0) (Standard)		The actual cost incurred for the campaign
Actual Cost in Hierarchy	Currency(18, 0) (Standard)		Actual cost incurred for the campaign within a hierarchy
Budgeted Cost	Currency(18, 0) (Standard)		Planned or budgeted cost for the campaign

Budgeted Cost in Hierarchy	Currency(18, 0) (Standard)		Planned or budgeted cost for the campaign within a hierarchy
Campaign Currency	Picklist(Standard)	USD, CAD, etc.	Currency used for financial transactions related to the campaign.
Campaign Member Type	Lookup(Record Type) (Standard)		Type of campaign member record associated with the campaign.
Campaign Name	Text(80) (Standard)		Name or title of the campaign for identification
Campaign Owner	Lookup(User) (Standard)		User responsible for managing the campaign
Number of Contacts	Number(9, 0) (Standard)		Number of contacts associated with the campaign.
Contacts in Hierarchy	Number(9, 0) (Standard)		Number of contacts associated with the campaign within a hierarchy
Converted Leads in Campaign	Number(9, 0) (Standard)		Number of leads converted within the campaign.
Converted Leads in Hierarchy	Number(9, 0) (Standard)		Number of leads converted within the campaign within a hierarchy.
Created By	Lookup(User) (Standard)		User or entity that created the campaign

			record
Description	Long Text Area(32000) (Standard)		Additional information or details about the campaign
End Date	Date(Standard)		Date when the campaign ends
Expected Response	Percent(8, 2) (Standard)		Expected response rate as a percentage for the campaign.
Expected Revenue in Campaign	Currency(18, 0) (Standard)		Anticipated revenue associated with the campaign.
Num Sent in Campaign	Number(18, 0) (Standard)		Number of items sent as part of the campaign
Parent Campaign:	Lookup(Campaign) (Standard)		Higher level campaign to which the current campaign is linked
Start Date	Date(Standard)		Date when the campaign starts
Status	Picklist(Standard)	Planned, Aborted, etc.	Current status of the campaign
Type	Picklist(Standard)	Conference, Email, etc.	Type or category of the campaign.

Case Object

Field Name	Data Type	Drop Down Values	Description
Account Name	Lookup(Account) (Standard)		The name of the account associated with the case.

Contact Name	Lookup(Contact) (Standard)		The name of the contact associated with the case.
Product	Picklist(Custom)	GC1040, GC1060, etc.	The product associated with the case.
Type	Picklist(Standard)	Electrical, Refund, Return, Faults, etc.	Type or category of the case
Case Currency	Picklist(Standard)	CAD, USD, etc.	The currency used for financial transactions related to the case
Case Account	Lookup(Account) (Custom)		The account associated with the case
Status	Picklist(Standard)	New, Working, etc.	Current status of the case
Priority	Picklist(Standard)	High, Medium, Low, etc.	Priority level assigned to the case
Case Origin	Picklist(Standard)	Phone, Email, Web.	The origin or source of the case
Case Reason	Picklist(Standard)	Installation, Performance, etc.	The reason or cause associated with the case
Case Type	Picklist(Custom)	Finance Application; Maintenance; New Vehicle Enquiry; Parts ordering etc	Type of Case
Web Company	Text(80)		Company name supplied via web for the case
Web Email	Email		Email address supplied via web for the case
Contract	Lookup		Contract associated with account
Entitlement Name	Lookup		Entitlement agreement

			associate with account
Priority	Picklist	High; Medium; Low	Priority level of case
SLA Type	Picklist	Basic; Premium	SLA associated with account
Vehicle	Lookup		Vehicle product list

Contact Object

Field Name	Data Type	Drop Down Values	Description
Account Name	Lookup		Name of Account associated with contact
Contact Owner	Lookup		Contact owner
Email	Email		Email of contact
Name	Name		Contact name
Phone	Phone		Contact Phone number

Contract Object

Field Name	Data Type	Drop Down Values	Description
Account Name	Lookup		Account associated with contract
Contact end date	Date		End date of contract

Contract Name	Text		Name of Contract
Contract Number	Auto number		Auto generated contract number
Contract owner	Lookup		Person that created contract
Contract start date	Date		Start date of Contract
Contract term	Number		Term of Contract
Customer signed date	Date		Date customer signed contract

Entitlement Object

Field Name	Data Type	Drop Down Values	Description
Account Name	Master-Detail(Account)		Account associated
Asset Name	LookUp(Asset)		
Business Hours	LookUp(Business Hours)		Business hours that entitlement can be enforced
Cases Per Entitlement	Number(9.0)		No, of cases per entitlement
Created By	LookUp(User)		Entitlement created by
End Date	Date/Time		End date of Entitlement
Entitlement Name	Text(255)		Name of Entitlement
Entitlement Process	LookUp(Entitlement Process)		Entitled process
Service Contract	Service Contract		Contract associated with

			Entitlement
--	--	--	-------------

Invoice Object

Field Name	Data Type	Drop Down Values	Description
Balance	Currency		Remaining Balance to be paid
Invoice Number	Auto number		Auto generated document number
Invoice Date	Date		Date of Invoice
Status	Picklist		
Total Amount	Formula		Total amount to be paid

Leads Object

Field Name	Data Type	Drop Down Values	Description
Annual Revenue	Currency (18, 0) (Standard)		All income generated from the sale of a Company's products or services in a year.
Bant Score	Formula (Number)		Part of lead qualification score
Budgeted amount	Currency		Budgeted amount indicated by lead

User Guide

Lead Management

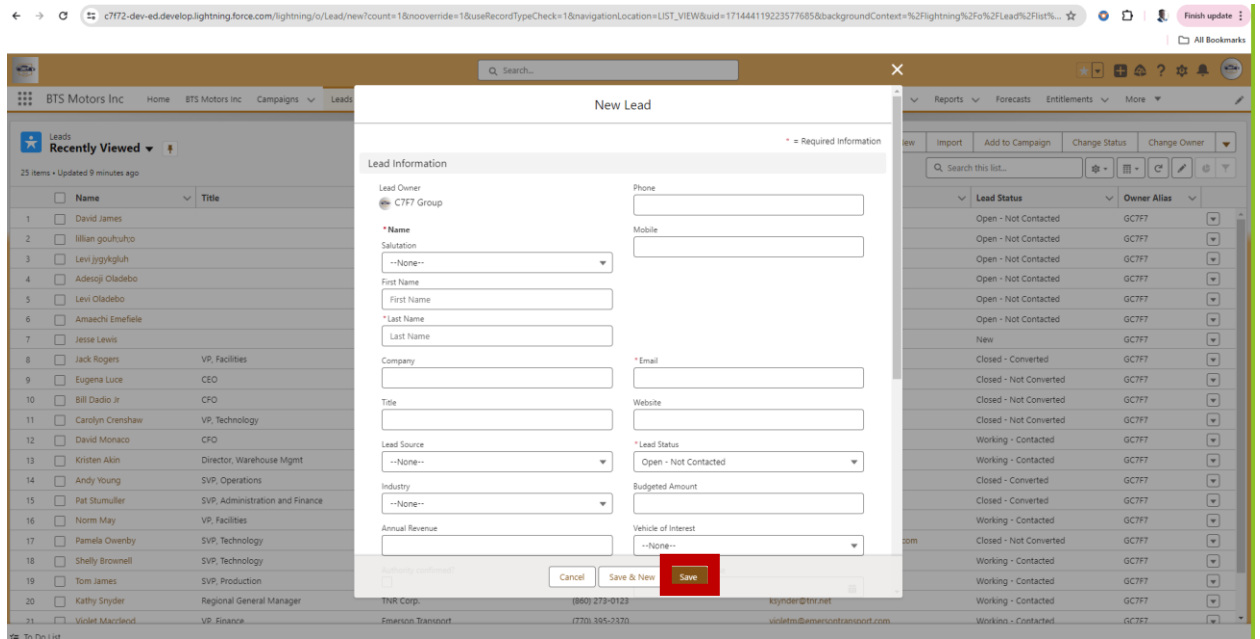

1. The Sales login to the BTS org.
<https://c7f72-dev-ed.develop.lightning.force.com/lightning/page/home>
2. Go to home page.

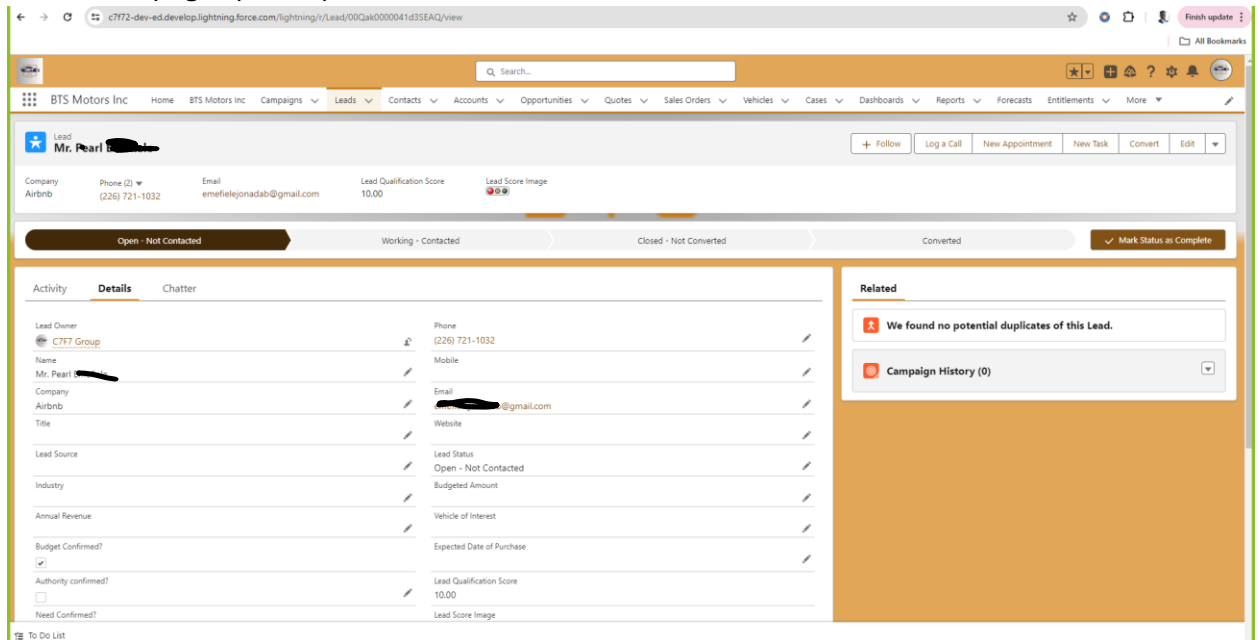

3. Select leads and click on the button - New.

4. Complete the form and select save

5. Lead detail page opens up

6. Sales rep contacts the prospect, fills out the form and click Save button

The screenshot shows a Salesforce Lead record for 'Mr. [REDACTED]'. The form is titled 'Lead' and includes a search bar. The main form area contains several sections: 'Industry' (dropdown), 'Annual Revenue' (text), 'Budget Confirmed?' (checkbox), 'Authority confirmed?' (checkbox), 'Need Confirmed?' (checkbox), 'Timeline confirmed?' (checkbox), 'Test Drive Confirmed?' (checkbox), 'Address' (text), 'Budgeted Amount' (text), 'Vehicle of Interest' (dropdown), 'Expected Date of Purchase' (calendar), 'Lead Qualification Score' (text), and 'Lead Score Image' (image). The 'Save' button is located at the bottom right of the form.

Note: Lead automatically convert when BANT is =>40

Otherwise reach to senior sales rep to review lead conversion score below 40.

7. Convert lead Dialogue box pops out

The screenshot shows the 'Convert Lead' dialog box in Salesforce. The dialog box has three tabs: 'Account', 'Contact', and 'Opportunity'. The 'Account' tab is active, showing 'Create New' and 'Choose Existing' options. The 'Contact' and 'Opportunity' tabs also show 'Create New' and 'Choose Existing' options. The 'Record Owner' is set to 'CTF7 Group' and the 'Converted Status' is 'Closed - Converted'. The 'Convert' button is visible at the bottom right of the dialog box.

- Under the opportunity field, create new or select the “create an opportunity after conversion” check box.

Conclusion

To conclude, the expectations outlined is for the Salesforce implementation project at BTS Motors to encompass comprehensive Sales Cloud and Service Cloud features and functionalities tailored to optimize lead management, opportunity tracking, account and contact management, sales process automation, territory management, and customer service operations. The project aims to centralize customer data, streamline sales and service processes, enhance analytics and reporting capabilities, and improve overall efficiency and collaboration within the organization. Additionally, the project emphasizes the importance of configuring Salesforce to meet BTS Motors' specific sales and service requirements, including territory assignment, case management, and entitlements. By leveraging Salesforce's robust capabilities and implementing tailored solutions, BTS Motors anticipates achieving greater operational efficiency, improved customer satisfaction, and sustained business growth. Furthermore, the project proposal includes a comprehensive plan for deployment, training, documentation, and ongoing support, ensuring a smooth transition to the new Salesforce system and continued success in the future.
